“Transparent teaching tips with OER for underprepared students”

This presentation will cover 5 transparent teaching tip that will assist the instructor in using OER materials. The first tip is the correct use of videos in creating OER materials. Student creation, and teacher creation will be examined. Also, how the instructor is using the material to chuck OER materials to the underprepared students. Tip 2 will cover how to always include examples of what makes an excellent assignment. Tip3 – the use of rubrics in the higher educational area will be described. Tip 4 always allow students to do a draft assignment so they can receive the necessary feedback. Tip 5 how using social media hashtags helps students to use and create OER materials.
